Education

**Bachelor of Engineering
(Electronics & Telecomm)**
University of Pune
Aug 2006 – Jun 2010
Pune, India

**Higher Secondary School
Certificate**
N M V Junior College
Jun 2004 – Apr 2006
Pune, India

Languages

- German
- English

Professional Summary

Strategic and results-driven Data Professional with over 15 years of experience in building robust, secure, and cost-effective data solutions for global organizations. Expert in **Azure and AWS ecosystems**, specializing in **Databricks (Medallion Architecture)**, **GenAI integration**, and complex cloud migrations. Proven track record in the **Insurance and MDM domains**, leading cross-functional offshore teams to deliver scalable data pipelines and advanced analytics frameworks.

Certificates

- Microsoft Certified : Azure Data Engineer (DP203)
- Microsoft Certified: Designing and Implementing Azure AI Solution (AI 102)

Work Experience

Senior Data Engineer
Manulife

Dec 2018 – present | Hongkong

- Cloud Architecture:** Architected and developed a **Synapse-configured ingestion framework in Azure**, enabling seamless integration of data from diverse **relational (Oracle, SQL Server) and non-relational (MongoDB, Kafka, JSON)** sources. This framework standardized ingestion across business units and reduced onboarding time for new sources. Developed a scalable Azure Data Lake using Medallion Architecture (Bronze/Silver/Gold), improving data reliability
- Generative AI Innovation:** Pioneered a GenAI sales enablement tool using **Azure OpenAI (GPT-4o)** and Python, reducing manual content generation time by 60% for the sales team.
- Cloud Migration:** Spearheaded the end-to-end migration of legacy on-premises NiFi workflows to Azure, eliminating on-prem maintenance costs and improving integration uptime to 99.9%.
- Real-time Streaming:** Engineered a high-throughput streaming pipeline using **Apache Kafka** and Databricks to ingest and flatten complex JSON data into ADLS for real-time reporting.
- Performance Optimization:** Optimized ELT processes using **Delta Live Tables**, reducing pipeline execution time by 40% through efficient partition pruning and Z-Ordering.
- Leadership:** Managed a team of 4 offshore engineers, consistently delivering complex sprints on time while maintaining high code quality through automated CI/CD (Jenkins/GitHub).

Senior Software Engineer
Larsen and Toubro

Aug 2017 – Nov 2018 | India

- Big Data Modernization:** Led the migration of legacy SAS jobs into **PySpark-based workflows**, achieving a **5x increase in processing speed** and reducing infrastructure costs by consolidating workloads onto distributed clusters.

Skills

Big Data Stack ● ● ● ● ●

Hadoop(Hive, Hbase, Sqoop, Oozie), Kafka

Cloud Computing ● ● ● ● ●

Azure(ADF, Synapse, Databricks) and AWS

Database ● ● ● ● ●

NO SQL - Hbase, MongoDB
SQL DB - Oracle

Data Integration Tools ● ● ● ● ●

Azure Data Factory, Nifi, Informatica 9.1

DevOps Tool ● ● ● ● ●

Azure Devops, GitHub, Jenkins

Scripting and Programming Language ● ● ● ● ●

Python, Unix

Data logging & Visualisation Tools ● ● ● ● ●

Log Analytics, Splunk, Kibana

Data Science/ML ● ● ● ● ●

Basic statistics, Numpy, Pandas

Courses

Big data on AWS

Pluralsight

Getting started with Kafka and Hbase

Pluralsight

Introduction to Data Science

Datacamp

Azure Databricks Data Engineer

- **PySpark Framework Development:** Architected reusable **PySpark ingestion and transformation modules** to standardize ETL processes across multiple domains, cutting development time for new pipelines.
- **Advanced PySpark Optimization:** Implemented **partitioning, caching, and broadcast joins** in PySpark to handle terabyte-scale datasets, reducing query execution times from hours to minutes.
- **Custom Engineering:** Developed **Spark UDFs** to encapsulate complex insurance business logic, enabling faster claims validation and reducing manual intervention.
- **Data Quality Automation:** Built PySpark-based **data validation scripts** that automatically flagged anomalies and ensured consistency across heterogeneous data sources.
- **POC Leadership:** Directed a successful **NiFi integration proof-of-concept**, later adopted as the enterprise-wide ingestion standard, improving scalability and reducing onboarding time for new data sources.

Technology Lead

Infosys 

Nov 2015 – Jul 2017 | India

- **Framework Development:** Engineered the **DART (Data Archival and Retrieval Tool)** framework, automating data movement between RDBMS and Hadoop for enterprise-wide archiving.
- **Data Transformation:** Ingested semi-structured data from MongoDB and restructured it into relational SQL schemas to support executive Power BI dashboards.
- **Team Lead:** Supervised 4 developers, ensuring adherence to coding standards and successful delivery of domain-specific pipelines in the Insurance sector.

Technology Consultant

Capgemini 

Dec 2013 – Nov 2015 | India

- **Migration:** Migrated mission-critical Mainframe SAS applications to **Informatica PowerCenter**, enhancing data warehouse ETL performance and maintainability.
- **Optimization:** Redesigned DB2 stored procedures and Informatica mappings (Router, Lookup, Joiner) to reduce daily batch windows by 2 hours.

Software Engineer

Zensar Technologies 

Jul 2010 – Dec 2013 | India

- **Mainframe Engineering:** Developed and maintained COBOL programs and JCL PROCs for large-scale financial reporting.
- **Maintenance:** Managed TSO/ISPF utilities and spool monitoring to ensure 24/7 availability of critical batch processing jobs.
